Profile

Results-driven MERN Stack Developer with hands-on experience building full-stack applications, real-time chat systems, and Al-powered tools. Skilled in JavaScript. Node.is. React. and MongoDB with a strong understanding of REST APIs. WebSockets, and cloud deployment. Built intelligent solutions like an Al-driven student portal, mental wellness chatbot using LoRA, and a secure social media platform. Experienced with AWS, Nginx, and scalable backend systems. Passionate about crafting clean, efficient code and solving real-world problems through technology.

Education

Coimbatore Institute Of Technology

B.E. Mechanical Engineering - cgpa 7.79*

Government Boys Higher Secondary School

Higher secondary - 85%

2022 - 2026 | Coimbatore, India

2019 - 2021 | Marandhalli, India

Skills

Languages:

Java, Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries:

React.js, React Native, Express.js, Flask (Intermediate), Bootstrap

Databases

MongoDB, MYSql

Tools / IDEs / Version Control:

VS Code, Postman, Git, GitHub

Professional Experience

TIA IT, Internship

03/2024 - 05/2024

Completed internship at TIA IT, a startup, contributing to backend development using Node.js, Express, and MongoDB, with AWS S3 integration and authentication systems. Optimized frontend workflows by minimizing API calls, enhancing data handling efficiency, and gained hands-on experience with web server configuration using Nginx.

Projects

AI-powered PROJECTHUB

- Developed a student project portal to upload and explore senior projects with an Al-powered RAG-based chat for interactive queries.
- Built intelligent text extraction APIs in Node.js for analyzing project reports.
- Integrated Convex for backend and file storage, and designed a modern UI with React + Bootstrap.

Campus Connect+

- Built a real-time inter-college communication platform with group and one-to-one chats using WebSockets (Socket.IO
- Designed user profiles with Firebase integration for uploading certificates, resumes, and coding links (GitHub, LeetCode,
- Developed with React, Bootstrap, Node.js, MongoDB, and implemented end-to-end encryption (in progress) for secure messaging.

Lora Med Al

- Built a junior therapist chatbot fine-tuned with LoRA + PEFT on thousands of emotional response samples for empathetic conversations.
- Trained on the DeepSeek R1 model to generate mental wellness support dialogues with improved contextual understanding and empathy.

Aluminium Al

- Developed a **mobile app** to predict aluminium strength based on alloy composition using **MultiOutputRegressor** (RandomForestRegressor).
- Built and deployed a **Flask API on Render** for model predictions and created a structured **React Native frontend** with a finalized APK for deployment.
